 **CRAEA Professional Learning Application Process-Staff** - the process for securing professional learning opportunities, both for yourself or your team, has been clearly defined. The initial step is to complete the application form within the CRAEA system either individually or by working with your team's administrative liaison. This form requires a detailed description of how the proposed learning aligns with the agency's strategic goals and the anticipated impact on student outcomes or staff practice, including evidence-based practices and a budget proposal. The application will be reviewed and a decision shared within two weeks. Please see the attachment for details.
